#### PRODUCT SPECIFICATIONS: The Covert Asset III

Item(s)	Performance
Housing	L 100mm/W23mm/H16mm
Weight	41 grams
Radio Technology	Frequency: 850/900/1800/1900 MHz
GPS/AGPS Functionality	Channels: 50 Channels, GPS L1 frequency
Battery	Grade A 1000 mAh Lithium Polymer
Battery Life	60 Second tracking moving a few hours a day: 5+ days. Battery Save Mode: Depends on the set interval to report a position. Can exceed more than 3 weeks using this mode. Data Burst Mode: Please view the section on data burst mode for more information.

They say beauty is only skin deep, it's what is underneath that matters. This device certainly matches that criteria boasting a size of only L100mm/W23mm/H16mm, yet retaining a battery capacity of 1000 mAh, -Covert Asset III – is the ideal versatile and covert tracking device to place where there is very little room to place such a tracking device.

#### Product Description:

There are very few devices within the industry today, that have this power matched with size and performance. Utilizing a good GPRS antenna with quality cable gives this device great coverage and speed when it comes to sending data.

Live tracking from ten seconds or even requesting a sim locate, comes naturally with our solutions. Being able to give so much flexibility in how you control such a tiny device is simply remarkable.

Not only completely water resistant and extremely robust, the Covert Asset III incorporates outstanding features within its durable rubber covering. The device has the ability to completely switch itself off, waking at set intervals to report on its current position. This battery saving mode is a stunning element for such a tiny device.

A further exclusive feature is the introduction of our new 'dData Burst Mode.' This enables the user to remotely switch off the modem using either the panel or the app, yet allowing the GPS to log all positions whilst in motion. The device will then automatically transmit all data across to our servers, also communicating to the user that this has been successfully achieved with the device now being switched on. Accordingly, the user can then decide whether to switch the device off again or revert to 'log mode.'

Charging the Covert Asset III is a straight forward procedure. Placed upon its own mat it will automatically charge without the need for buttons or switches. Simplicity at its best !
